Education

HKBK Coleege Of Engineering

Bachelor of Technology in Computer Science and Engineering

Dec. 2020 – May 2024

Bengaluru, Karnataka

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Artificial Intelligence
- Systems Programming
- CI/CD
- Database Management
- Big Data
- Computer Architecture

Experience

Cronbay Technoogies Pvt. Ltd.

Junior Full Stack Developer

May 2024 – Present

Bengaluru, Karnataka

- Designed, developed, and deployed multiple web applications, enhancing **user experience, performance, and SEO optimization**.
- Built a **Demand-Side Platform (DSP) website**, collaborating with SEO and design teams using **HTML, CSS, and JavaScript**, ensuring **faster load times and better indexing**.
- Developed a **Template Download Platform** using **React, Tailwind CSS** for frontend, **PHP (RESTful API)**, and **MySQL** for backend, optimizing **database queries and API response times for better efficiency**.
- Engineered a **high-performance web application** using **React, PHP, and MySQL**, implementing **lazy loading, caching, and code-splitting for improved page speed**.
- Partnered with clients and SEO teams to develop and maintain a **Laravel-based website for heavy machinery**, focusing on **SEO best practices, schema markup, and content optimization**.
- **Deployed and managed websites on AWS Lightsail and cPanel**, improving **server uptime and reducing latency**.
- **Implemented SSL certificates, security patches, ensuring website security, compliance, and faster global access**.

Projects

Cron-media | *React.js, Tailwind, PHP, MySQL, AWS Ligtsail*

August 2024

- Developed a Template Distributions site using **React.js** and **tailwind CSS** for frontend and **PHP(RESTful API)** and **MySQL** for backend.
- Integrated **Google login and register API** for faster and secure login system.
- Deployed website on **AWS Lightsail** virtual instances, optimizing server performance, reducing load times, and ensuring high availability.
- Optimized using browser developer tools like **Lighthouse**.

Cypera | *React.js, Tailwind, PHP, MySQL, cPanel*

November 2024

- Created a template for a digital marketing site using **React.js** and **Tailwind CSS** for front-end, **PHP** and **MySQL** for back-end.
- Made the template fully responsive for all device sizes using **tailwind CSS**.
- Deployed the site using **cPanel** which provide a full solution for deploying a full stack site.

Portfolio Website | *React.js, Tailwind CSS, Framer Motion, Firebase*

February 2025

- Designed and developed my portfolio website using **React.js** and **Tailwind CSS** to making it responsive and optimized.
- Deployed on **Google Firebase** for faster and secure deployment.
- Implemented a min snake game using **react state** and various hooks.

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript, SQL, MySQL, MongoDB PHP

Developer Tools: VS Code, Github, Developer Console

Technologies/Frameworks: Linux, React.js, Tailwind CSS, Node.js , GitHub Automation, Shopify, WordPress

Certification

- SQL Certificate Sololearn December 2022
- JavaScript Essential Training LinkedIn Learning January 2023
- React.js Essential Training LinkedIn Learning January 2023
